

Industrial plastering unit AGREKOM 110L

Manufacturer	
Dimension	48 x 100cm
Weight	70.00 kg
EAN	5903672755474
SKU	003876
Application	For spraying masses, e.g. thin-layer plasters, spray wallpapers, adhesives for mesh, plaster, paints
IBB ID	13733

Industrial plastering unit AGREKOM 110L

Description:

The industrial plastering unit has been developed for spraying façade plasters, dense gypsum plasters, gypsum smoothies, filling, plaster roughcast and also for spraying paint with dense emulsions.

The machine is equipped with two guns for spraying substances of different densities.

The AK10 PRO industrial plaster gun for dense materials provides a smooth spray of the substance with extremely high efficiency. The gun has the possibility to block the spray by releasing the trigger. This is a solution that significantly increases working comfort. The plaster gun has been enhanced with the modern AIR PRO nozzle system. They provide the optimum amount of air necessary for spraying dense materials.

The kit also includes the MF77 industrial paint gun. The gun is ideal for painting with thick emulsion paints and facade paints. The easy spray adjustment allows you to quickly adjust the width of the paint stream to the surface to be painted.

The plastering unit is based on a 110-litre tank with a cone-shaped bottom, thanks to which the material flows easily into the tank outlet.

Application:

- Spray application of structural plasters (facade plasters like sand textured, mineral, silicone, silicate, and acrylic plasters)
- Spraying of gypsum plaster finish (flat stream)
- Wall spackling (rendering)
- Spraying glue onto mesh when insulating
- Spray painting (also with dense emulsions)
- Priming walls
- Applying liquid wallpaper
- Spraying of fire retardants
- Impregnation

Set includes:

110-litre tank,

AK10 PRO industrial plastering gun,
set of 4, 6, 8, 10, 12 mm nozzles,
AIR PRO nozzles 4, 6, 8 mm,
professional spray painting and priming gun,
double metal reducer,
10 m hose.

The 10 and 15 metre technical hoses are sold in two sections. On request, the hose can be in one piece.
