### Product specification

Manufacturer

BELLA PLAST

Unit

pcs

Window and expansion strips with a gasket are intended for making expansion joints and finishing the connection between the plaster and the window frame, covered with various types of cement-lime or gypsum plasters. Prevents the formation of cracks and scratches at the junction of the frame and plaster. Protects window frames against dirt during plastering works.

benefits:

- no cracks at the junction of the window frame and plaster
- even, aesthetic plaster finish around the window
- easy and quick installation by gluing the strip to the frame
