### Protection board COREX plastic white 3mm x 1.2m x 2.4mm

Best - selling Proguard Correx Protection Board is the ideal temporary protection product to have on any job, whether it be refurbishment, building or construction. The strong corrugated polypropylene plastic sheets offer complete surface protection. They can be cut, curved or creased to fit which makes them the perfect temporary floor protection sheets suitable for doors, windows, floors, walls, stairs and more!

Unlike heavy alternatives such as plywood or hardwood, these protective plastic sheets are extremely lightweight whilst still being tear, puncture and impact resistant. They are also waterproof so won't be affected by moisture meaning they can be used outdoors. Many of our customers get their correx boards custom printed with their company logo and use them outdoors to create temporary screening around their worksite.
