Self-adhesive protection film for windows blue 600mm x 100m

Proguard Window Protection Film is a 100% waterproof, high-quality self-adhesive film designed specifically for the protection of windows, glazed glass panels and window frames which are often susceptible to scratches, plaster and paint splashes especially during refurbishment.

The lightweight rolls are forward wound (adhesive side is on the inside and therefore not exposed to dirt) which makes the rolls perfect for application with our Proguard Window Film Applicator or by hand.

The low tack adhesive backing adheres to most surfaces without any tape required and will stay securely in place once applied. After use, it can be peeled away without leaving any residue which can be a problem with poor quality films. Unlike some alternative products Proguard Window Film has anti-UV properties to ensure that direct sunlight does not cause the adhesive to transfer onto the windows.

Roll Length: 600mm x 100m

Colour: Blue

Benefits:

The low tack adhesive leaves no residue when removed

UV protected

Lightweight, easy-to-handle rolls

100% waterproof – suitable for both internal and external use
Easy to cut with a knife
