Blue Dolphin KILLER Paint Roller Series 330 is a paint roller made of the innovative MICROFIBER BLEND material, which absorbs and releases paint better and does not leave any bristles. Its advantage is also simple mounting. Even after repeated use, it retains its original fluffiness. Thanks to the use of bevels at the ends of the roller, paint build-up on the edges is eliminated.

Advantages of the KILLER paint roller:

- rolls very well - does not slip while painting;
- can be used for all types of paints: acrylics, latex, oil with both matte and glossy effects;
- leaves no bristles;
- greater absorbency and better paint release;
- does not have a complicated internal fastening system;
- highly technological innovative plating;
- strong polypropylene tube resistant to solvents;
- retains its original fluffiness after repeated use;
- bevels on the sides of the roller eliminate paint build-up on the edge.

APPLICATION:

9 mm hair:

surfaces: smooth;
painting effect: extra smooth.

13mm pile:

surfaces: semi-smooth, slightly rough;
painting effect: smooth.
