Blue Dolphin HEKTOR Series 330 paint roller is a paint roller made of POLYESTER material, which absorbs and releases paint better, and at the same time does not leave bristles. Its advantage is also uncomplicated mounting. Even with repeated use of your original density. Thanks to the chamfers at the ends of the roller, paint build-up on the edges is eliminated.

Advantages of the HEKTOR paint roller 25 cm / 13 mm:

- rolls very well - does not slip while painting;
- can be of origin for all types of paints: acrylics, latex, oils with both matte and gloss accuracy;
- leaves no bristles;
- greater absorbency and better paint release;
- does not have a special control system;
- high observed canopy;
- polypropylene strong tube interested;
- original density with repeated use;
- bevels on the sides of the roller eliminate paint build-up on the edge.

Application:

surfaces: semi-smooth, slightly rough;
 finish effect: smooth.
