Are you looking for an unusual but practical radiator for your bathroom? Meet ASTRO - an asymmetric radiator with a double row of tubes.. It offers increased heating power, more space for drying towels and clothes and great freedom in assembly. The radiator manifolds can be installed on the right or left side - in response to the arrangement of your bathroom and the existing layout of the heating system. Thanks to the cooperation with an electric heating element, the radiator works all year

round, not only in the autumn-winter season. It is available in as many as 22 colours, what gives great arrangement possibilities.
