Cutting knives for WALMER tile cutter.

As a standard, in devices of the MGLR II, MGM, MGZ, MGPL series, a Φ 10 cutting knife is installed.

It is a universal cutting blade for all types of wall and floor tiles.

In addition, due to the small diameter, the 8mm cutting knife allows you to cut stoneware with rough surfaces.

It is possible to replace the 10mm blade with a larger size: 12mm. This is dictated by the greater thickness of the tiles.
