Product specification

Manufacturer	WYKAMOL	Unit	pcs
Dimension	90 x 360 x 530 mm		

DRAINAGE OUTLET

The Wykamol Universal Channel Outlet directs any water ingress from drainage channels into a sump chamber, as part of a Type C Cavity Drain Membrane System.

The Wykamo Universal Channel Outlet is designed to remove water from the channels to a sump chamber as part of a perimeter channel drainage system in a basement.

It can be used in conjunction with both waterguard channels and floor drain channels.

It has a 100 mm outlet for high water movement and easier installation into a sump chamber.

It comes with a jetting eye which can be cut down to suit a range of floor finishes.

Quick and easy to install

100 mm pipework to direct large amounts of water ingress into a predetermined sump chamber or land drain

Tough and durable

Part of a complete Type C cavity drain membrane system for waterproofing below-ground structures in line with BS8102:2009
