Dpc 5 Litre Cream or Fluid Applicator in Orange

This spray applicator takes up to 5 litres of DPC cream or fluid. Ideal for larger DPC applications as it can be used for long periods of time without the dropping of pressure, unlike hand operated devices.

Ultracure is a unique silicone emulsion cream for injection into brickwork to control rising damp. Ultracure can be used in all types of masonry without the use of high pressure equipment. BBA approved.

Siliconate K is a clear, odourless concentrate of Potassium Methyl Siliconate, for the prevention of damp. BBA approved.
