IBB ID	9746

Product specification

Manufacturer	COMENSAL	Unit	pcs
Brand	comensal bravo	EAN	5902060002374
Country of manufacture	Poland		

High-quality stainless steel trowel with a small tooth 4x4 mm - dimensions 270x125 mm - elastomer handle

COMENSAL stainless steel trowel from the professional BRAVO line, designed for spreading self-dissolving, thick-layer and deformable adhesives on tiles during tiling works and making grooves on them, which guarantee better adhesion of the tile to the substrate.

All toothed trowels in this series have been created with the user's maximum comfort and work efficiency in mind. The solutions, raw materials and technologies used here translate into perceptible comfort and a sense of effectiveness and precision of the achieved effect.

COMENSAL tile adhesive trowel - tested and recommended in the construction community, is one of the most frequently chosen products from the professional COMENSAL BRAVO line.

handle:

Ergonomic handle, large and comfortable, profiled in such a way as to relieve the hand as much as possible during long hours of work.

To the touch, it resembles a pleasant, smooth but dull rubber: it does not slip out of the hand, gives a sense of comfort and "control" over the tool without the need for a constant strong grip.

It is permanently and stably connected to the base with an aluminum foot.

Made of elastomer, it is characterized by high resistance to abrasion and extreme temperatures.

working part:

The working part with the size of 270 x 125 mm, tooth 4x4 mm, is made of high-quality stainless steel. Thanks to the addition

of special alloying elements, it is highly resistant to corrosion and chemical environment.
The working plate is thick and resistant to mechanical deformation, and the teeth remain in one plane even after intensive use.

adjusting the tool to your needs:

COMENSAL BRAVO notched trowels are available in all tooth sizes needed during tiling works.

For the needs of large tiles and curved surfaces, we offer trowels with large teeth and half-round teeth, and for mosaic tiles with small teeth.

For lovers of natural solutions, we recommend notched trowels with profiled wooden handles, available at other auctions.

quality:

All raw materials used for the production of this tool are of the highest quality and come from reliable suppliers.

COMENSAL BRAVO trowels are thought out in terms of comfort and usability, they are characterized by extraordinary durability and aesthetics. They are resistant to corrosion, chemical environment, abrasion and even minor mechanical damage.

Properly maintained and cleaned, they will support renovation works for a long time.
