

Toile leveling system COMENSAL - 1 mm - 110 clips + 55 wedges + clips tool

Manufacturer	
Weight	0.20 kg
Product Code	843-06
EAN	5902060843069
SKU	000761
IBB ID	10158

Product specification

Manufacturer	COMENSAL	Unit	pcs
EAN	5902060843069		

Tile Leveling Starter Kit: 1mm clips (110 pcs) wedges (55 pcs) with storage bucket and pliers

The COMENSAL Starter Kit contains everything you need to get started with the Tile Leveling System for the first time:

- Clips 1mm - 110 pcs.
- Wedges - 55 pcs.
- Adjustable crimping pliers - 1 pc.
- Bucket for storing reusable items: wedges and pliers

Using the system gives you a noticeable time saving and a sense of total control over your work, regardless of your skill level.

Your renovation - our tools

The COMENSAL tile leveling system is an INVESTMENT in IMMEDIATE benefits that you experience from the very first moment of working with it:

- Faster pace of work - YES
- Feeling of control over the correctness of work - YES
- Reduction of stress and risk of errors - YES
- Eliminating the need for corrections - YES

With the use of the COMENSAL leveling system, you build your image of a Professional Tiler from your very first project.

Clips

All components of the COMENSAL leveling system are manufactured in Poland. They are subject to regular quality control and maintain full repeatability regardless of the production batch

Disposable clips regulate the width of the joint, keeping it in one repeatable pattern.

Made of high quality raw material, they are durable when crimping.

Thanks to the optimal thickness of the constrictions, they break easily.

The slight bend of the base causes the sides to be tightened when the wedge is tightened, which prepares the clip for easy breaking.

The clip is in a bright color. It cannot be overlooked

All COMENSAL clips fit tiles with a typical range of heights: 6mm - max. 16mm

The kit includes 1mm thick clips

Quantity: 110 pcs

Wedges

Reusable wedges are used to stabilize the clips when working with the leveling system

Made of high-quality raw material, they are wear-resistant.

Thanks to the pronounced deep serration, they are easy to assemble by hand or with pliers.

The teeth are deep, 75 mm apart. The clip easily clicks into them and holds firmly without the risk of jumping out

The wedges fit all sizes of COMENSAL clips as well as many other clips available on the market

Quantity: 55 pcs

Wedge clamping pliers

COMENSAL Universal Pliers are used to clamp wedges when working with the tile leveling system

- They are made of high quality hard plastic resistant to cracks.
- They have a well-adjusted and strong clamping mechanism, thanks to which they are durable, effective and comfortable to use
- They are solid, fit in the hand as befits a tool designed for long hours of work.
- Thanks to easy adjustment, they are suitable for different tile thicknesses
- They fit most of the systems available on the market.

COMENSAL crimping pliers increase work efficiency: fast and precise clamping of wedges. By using them, you make your work easier and you are sure that the system is properly installed

The system is proven in action

The COMENSAL tile leveling system has been tested in natural conditions by 50 Polish tilers in the Pre-Premiere Test Program.

It was positively assessed by them in surveys and defined as:

- meeting expectations in 100%
- as good or better than the system used so far

What do you gain by using the COMENSAL tile leveling system

The laid tiles are properly stabilized and do not move during work.

You arrange them evenly, quickly, without the risk of mistakes and stress. Vertically and horizontally, on small and large surfaces

The COMENSAL system is intuitive and easy to install.

By working with it, you maintain one repeatable pattern on the entire working plane.

You work quickly, without corrections, and the effect of elegantly laid tiles is visible right away.

All components of the COMENSAL system, proven in quality tests, effectively fulfill their task.

The system has a good price and high quality.

Demand calculation

Number of clips needed for the job is the result of the size of the tiles being laid and the area planned for the project.

The numbers given in the table are the minimum quantities necessary to use one square meter of tiles of a given size, without taking into account inserts, cut-outs and stucco.

Complementarity

COMENSAL clips available on other auctions with joint thickness: 1, 1.5, 2, 3 mm. For your convenience, the clips have different colors assigned to the given sizes.
