Smooth stainless steel float for spreading plaster and plaster - dimensions 270x130 mm - wooden handle

The COMENSAL stainless steel trowel with a wooden handle from the BRAVO WOOD professional line for putty and plaster was created with the user's comfort and work efficiency in mind, for lovers of natural and traditional solutions.

The technologies and raw materials used in its production translate into a noticeable comfort of work and a sense of effectiveness and precision of the effect achieved. Mortars spread smoothly and the hand remains significantly relieved even after many hours of use.

The trowel is durable, easy to clean and maintain, friendly to fans of traditional solutions who value modern quality and expect full "cooperation" with the tool.

COMENSAL BRAVO trowel for plaster and plaster - tested and liked in the construction community.

Handle

Made of beech wood, it has been profiled in such a way as to relieve the hand and optimally fit it during long hours of work. It is permanently and stably connected to the base with an aluminum foot.

Made of selected, well-dried wood, it has been secured with wax, thanks to which it is smooth and pleasant to the touch, and largely resistant to moisture. Wood lovers will certainly appreciate its natural qualities.

The working part (270x130 mm) is made of high-quality stainless steel containing a special complex of alloying elements such as nickel, nitrogen, manganese and others. Thanks to this, it is highly resistant to corrosion and chemical environment. The working surface ensures obtaining the expected effect of a perfectly smooth surface even with difficult mortars. The thickness of the trowel is 0.7 mm, which increases its resistance to deformation and makes it durable.

Quality

The tool was made of the highest quality raw materials from proven suppliers, using modern technology that increases resistance to unfavorable working conditions.

They are easy to clean by washing off with water the remains of plaster and plaster that have not dried on. It is well thought out in terms of comfort and usability, and is characterized by extraordinary durability and aesthetics. Resistant to corrosion, chemical environment, abrasion and even minor mechanical damage.
