Manufacturer	COMENSAL	Unit	pcs
Brand	comensal bravo	EAN	5902060952068

Facade putty knife with a high blade made of stainless steel for smoothing and leveling plasters - blade length 550 mm

High-quality putty for staff by COMENSAL from the professional BRAVO line.

Intended for applying gypsum plasters and leveling plasters. Created with the user's comfort and work efficiency in mind.

The solutions, raw materials and technologies used in its production translate into a noticeable comfort of work and a sense of efficiency and precision of the effect achieved.

Mortars spread smoothly and the hand remains significantly relieved even after many hours of use.

The wide blade (90mm) is made of stainless steel. It is resilient and allows you to apply a thin layer of plaster.

The excellent quality of the tool is noticeable throughout its lifetime, which is why it is one of the most popular COMENSAL products. Tested and recommended in the construction community.

Handle:

The handle is large, comfortable and profiled for the characteristic grip used when working with this tool. It "lies" in the hand and relieves it to the maximum during long working hours.

To the touch, it resembles a pleasant, smooth but dull rubber: it does not slip, gives a sense of comfort and "control" over the tool, without the need for a constant strong grip.

It is stably connected to the blade with a reinforced aluminum profile. Permanently attached with rivets.

Made of elastomer, it is characterized by high resistance to abrasion and extreme temperatures.

The hole in the handle allows you to hang the putty in the workshop, keep order and, as a result, protect the tool from damage.

Edge:

The wide blade of the putty knife is made of high-quality stainless steel.

It has been permanently embedded in an aluminum profile, additionally reinforced for perfect stiffening of the tool.

It is stable and rigidly embedded in the profile, and at the same time resilient. In a natural way, the effect of a smoothly drawn surface is achieved.

Dimensions:

Blade length along the sharp edge: 550mm

Blade height: 90mm

Aluminum profile height: 40mm

Quality:

The tool was made of the highest quality raw materials from proven suppliers, using modern technology that increases resistance to unfavorable working conditions.

They are easy to clean by washing off with water the remains of plaster and plaster that have not dried on.

It is thought out in terms of comfort and usability, it is characterized by extraordinary durability and aesthetics.

Resistant to corrosion, chemical environment, abrasion and even minor mechanical damage.
