

Tiling bucket in basic equipment - with triple rollers for squeezing water

Brand	COMENSAL BRAVO
Manufacturer	
Weight	2.50 kg
Product Code	713-00
SKU	000666
IBB ID	666.0000

Product specification

Manufacturer	COMENSAL	Unit	pcs
Brand	comensal bravo		

Tiling bucket in basic equipment - with triple rollers for squeezing water

Bucket:

A strong, stable bucket with legs and a rigid handle profiled for fingers.

Made of high-quality plastic, it is durable, aesthetic and keeps its shape when carrying water.

The handle is comfortable, and the way it is built and attached guarantees that it can hold the weight.

The shape and dimensions of the bucket create an optimal space for the necessary activities:

free rinsing of the tool,

setting the grid to squeeze out excess water,

easy to use rollers.

Bucket dimensions: 268x520x270mm

Rollers:

Patented system of triple perforated rollers designed for the COMENSAL 24L bucket.

Made of high-quality plastic, it is durable and reliable.

The rollers, mounted on the bucket, hold firmly on it and enable effective imprinting of the trowel with a sponge at the expected level.

They can be dismantled if necessary. The bucket can then be used for other renovation work.

To increase stability, the system has been reinforced with double galvanized metal rods, which provide effective protection against rust.

When pressing the trowel, the rollers rotate around their own axis, and thanks to the use of a slight inclination of the structure to one side, the water flows straight into the bucket.

Dimensions:

Roll diameter: 40mm

Overall external dimension: 280x150mm

Inner distance between clamping grooves: 245mm

Outer distance between clamping grooves: 280mm

Clamping groove length: 140mm
