IBB ID	10346

Product specification

Manufacturer	BORAMAX	Unit	pcs
Brand	boramax	Colour	white
Country of manufacture	Poland		

FAST AND LIGHT ACRYLIC - Ultra light and fast acrylic filler is characterized by a short initial drying time, which allows us to paint quite quickly.

It has very good adhesion to all porous substrates such as concrete, plaster, gypsum, construction ceramics, stone, wood.

PROPERTIES

- Its flexible and very plastic formula provides us with a non-cracking and flexible joint free from cracks.
- Paintable after several minutes (10-20 minutes depending on the ambient temperature and humidity).
- Due to its lightness, it is very easy to apply and fill ceilings.
- The product does not contain solvents, which makes it safe for decorative materials.
- Has excellent adhesion to typical substrates such as plasterboard, concrete, brick, wood, stone, aluminum.

APPLICATION

Masking screw heads and screws (e.g. when installing plasterboards, wall panelling, suspended ceilings

· Grouting plasterboards. Giving the possibility of grinding and easy painting after the joint has hardened.

· Grouting joints between wall panels and the floor, floor and ceiling moldings, window sills. Resistant to cracking and shrinkage cracks, has increased flexibility. It has very good adhesion to all porous substrates such as concrete, plaster, gypsum, construction ceramics, stone, wood.
