TuffStuff® Grey Slate Top Coat is the most popular colour within our range and we are pleased to offer this to our customers ready mixed for use.

Each 15kg tin will cover approximately 30 square metres of roof space.

Catalyst must be added to the top coat prior to application to ensure it fully cures.

If using multiple tins for the same roof make sure they are mixed together to avoid the chance of noticeable colour variations.

Note: The BLACK lid indicates that the can is full of Grey Slate Top Coat Resin.
