The decorative Roma stone is a great way to bring the unique atmosphere of the Eternal City to the interior and beyond - the bustle of markets, a labyrinth of narrow streets, the aroma of spices and freshly ground coffee.

The wide range of colors of the collection allows for extraordinary design and implementation freedom, regardless of the place of Roman inspiration.

Cool colors such as gray or graphite work best in minimalist interiors, sparing in detail, where stone is combined with the highest quality materials: glass, metal or steel.

Warm shades - cream, brown, caramel or sahara perfectly match interiors with a classic style, with a fireplace located in the central place and decor elements in a cozy range of colors, reminiscent of a lazy afternoon in one of the pubs on the Tiber. The Roma collection is suitable for both for indoor use, such as the living room, dining room or bathing area, as well as for outdoor use: in the entrance area of the house, on the front and courtyard facades. The type of application depends only on the imagination of the architect.
