The Livorno interior decorative stone brings Tuscan chic to any interior. The irregular drawing of the face of the wall is a decoration in itself, and the non-uniform arrangement of the cladding creates a dynamic composition, giving the arrangement an interesting and unusual look. With properly selected lighting, the Livorno stone builds a unique "theatre" of chiaroscuro, enriching any space. The cladding fits best with modern equipment, expressive colors and dark wood. It also works well in interiors inspired by nature and eco style, where stone is combined with natural materials such as wood or linen. Livorno in the color of off-white looks spectacular with the help of potted plants, being a perfect element of the winter garden, while Livorno in the color of sahara warms up the industrial and modern interior.
