Grout for decorative stones Stone Master 5kg

Grout designed for pointing concrete and gypsum stones as well as ceramic and clinker tiles.

Available in a wide range of colors.

Easy to use, allows you to quickly and effectively finish the stone composition and give it its final shape.

Made of non-flammable, water- and frost-resistant material, thanks to which it is resistant to weather conditions and can be used outdoors.

It is intended for decorative and facade stones, clinker and ceramic tiles.

Joint width: 6 to 15 mm.

Mixing proportion: 0.16-0.18 liters of water / 1 kg of mortar.

Consumption – depending on the size of the tiles, depth and width of the joint, average from 1 to 3 kg/m².

Usage time after mixing with water: up to 1 hour.

Detailed information on handling the product is included on the packaging label.

Available in 5 kg bags.
